11 July 1961

MEMORANDUM FOR: 25X1A9a
ATTENTION : [REDACTED]
SUBJECT : Miscellaneous Cartographic Liaison Arrangements
REFERENCE : Memo No. 446 of 30 June 1961

1. Measle Maps - Ref your la. We concur on all facets of this paragraph. We sent a list of targets mentioned in the July 1961 Hungary Questionnaire as an enclosure to my T-636, of 20 June 1961. We would like 150 copies of a measle map to accompany the mimeographed Questionnaire. We will send a list on future Questionnaires by the fastest means available (either air mail or through [REDACTED] for your attention. We definitely would like a finished measle map for each new Questionnaire - starting with Hungary. We have already made dissemination of the mimeographed copies of the 1961 Czechoslovakian Questionnaire.

25X1X7

Ref your lb. We would prefer a single-sheet index for Mosaic coverage combining 1:25,000 and 1:50,000 coverage on each satellite; Poland, Czechoslovakia, Hungary, Rumania, and Bulgaria. It would be classified and could contain index numbers for 1:50,000 coverage. We would keep the listing 1:50,000 up to date. Some of the 1:25,000 Mosaic coverage has been compiled. This type of index if done over the NIS base would be most useful for reference and field use.

Ref your lc. We believe it is too late for any practical use to be made of a Poland Measle Map. The Hungarian Measle Map should be followed by a Bulgarian Map about 1 October 1961.

Looking at the overall situation, those maps which would be most useful to the TFP-Satellites for the near future would be:

25X1X7

Requirements

Map Versions

D/WL Library (a)
stock only

USGS/AMS 1:100,000 scale index over the NIS standard base on each satellite country (already prepared by D/6C - unclassified.

5 copies for (b)
each satellite

Classified Mosaic Index for 1:25,000 and 1:50,000 Mosaics over the NIS standard base and

150 copies (c)

A Measle Map for each new questionnaire printed over item (a) - classified
